

First think about your safety.

When you arrive at the work site, make your presence known.

Follow the safety instructions and rules of conduct for your work site. Depending on the site, sign the prevention and safety plan.

Familiarise yourself with the emergency procedures (assembly point, first aiders, etc.).

Follow the instructions for chemical use.

Your vehicle must be clean and tidy to uphold the company's image.

Make sure you have an absorbent mat for the hydraulic oil and a collecting pan.

Wear gloves for all operations.

Wear safety shoes during your work.

Wear a hard hat and goggles for all operations.

Use hearing protection (ear defenders or earplugs).

Make sure you have a sling chain, chocks, fork sleeves and a safety vest.

Mark out your work zone.

Your work zone must be clean and tidy.

Use the appropriate tools.

Carry out your work during site opening hours.

Make sure that there is somebody else on the site.

Make sure that you know who to contact in an emergency.

Seatbelts must be worn on forklift trucks.

Respect the flow of traffic and the pedestrian zones.

Make sure you have the accreditations you need (electrical, bridge crane, driving).

Remain alert in all situations.
